Rinnai

Relax. It's a Rinnai.

Continuous flow or instantaneous means you will never run out of hot water - the hot water system works by igniting a flame when you turn the hot water tap on.

ELGAS

Hot Water

Safe, Reliable, Never ending hot water...

This means, 1. you have the convenience of hot water on demand. 2. You only heat the water as you need it. 3. You only pay for what you use. Continuous flow hot water systems also provide you with the option of temperature controllers. An LPG continuous flow hot water system is compact and they are installed wall mounted.

Innovation in Hot Water!

BOSCH
Invented for life

Introducing the Bosch OptiFlow
with Bluetooth connectivity

 **OptiFlow**

Patented OptiFlow combustion
management system

Bluetooth enabled appliance

6 star efficiency

Solar compatible appliance

The Bosch OptiFlow range is the first Bluetooth connected hot water appliance in the Australian market. When paired with the "Bosch Water" (User APP) or "Bosch ProWater" (Plumber APP).

The end user can: control water temperature, view running costs and energy usage data

The Plumber can: run diagnostics and performance monitoring in real time, adjust or back-up product settings

The Bosch OptiFlow features the patented OptiFlow Combustion Management System to ensure an optimised air/gas mixture over the lifetime of the appliance.

ELGAS

Continuous flow means you'll never run out of hot water when those extra guests drop in.

Reliability of supply separates Elgas from other LPG Gas suppliers.

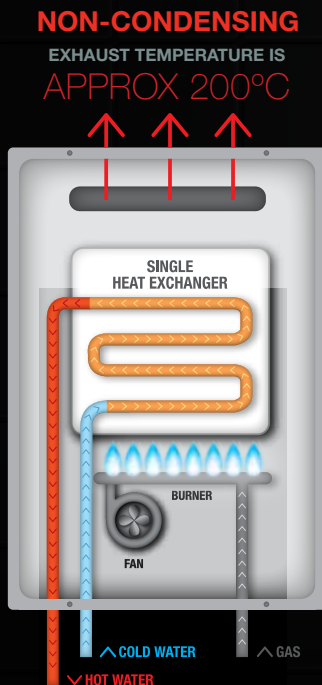

The Elgas Cavern is the largest LPG Gas storage facility in Australia, based in Sydney. Along with the Elgas Bulk terminal in Victoria, Elgas remains committed to providing and delivering LPG in a timely and reliable manner.

NEW

(Condensing technology)
Thermal efficiency = 90-96%

(Conventional technology)
Thermal efficiency = 80-84%

CONTINUOUS
FLOW JUST
GOT A LOT
BETTER!

Dux Condensing Continuous Flow

The next generation in continuous flow

- Features superior condensing technology that boasts over 90% thermal efficiency by capturing additional heat in the secondary heat exchanger
- Captures and re-uses circa 150°C of exhaust heat normally wasted, which delivers big energy savings and reduces emissions

*Based on a 3 star shower rose and assuming 40°C shower temp and 15°C cold water temp on a 170L Dux Prodigy 5.

Solar hot water systems provide combinations of performance, durability & features.

Hot Water

Harness the power of the sun...

Australians love their sunshine - and we sure have plenty of it! But we can do more than just enjoy it, we can harness the power of the sun for our own energy needs. Using a solar system is a great way for you to reduce Greenhouse gas emissions. With a gas-boosted solar hot water system you'll always have plenty of hot water (even when the sun isn't shining), and you'll be vastly reducing the cost to our environment.

Heating

ELGAS

For real warmth, go with gas

There's no better way to provide real warmth to every corner of your home than with the ambient warmth of a gas heater. There is a wide range of Gas heaters to choose from, so whether its the speed or effectiveness of a radiant or convector heater you need for your home Elgas can accommodate you.

Portable Gas Heaters (Unflued)

Choose from either a radiant (direct heat) or a fan assisted convection heater or the combination of both - radiant and convection. A portable heater can be moved where needed, from one room to another as long as each room has an approved bayonet connection. They are also much easier to take with you should you move house. In some areas there may be restrictions associated with unflued heaters, so it is recommended that you check with your retailer prior to purchase.

ELGAS

Instant heat means comfort at the press of a button.

Flued

Heating

For real warmth, go with gas

There's no better way to provide real warmth to every corner of your home than with the ambient warmth of a gas heater. There is a wide range of Gas heaters to choose from, so whether its the speed or effectiveness of a radiant or convector heater you need for your home Elgas can accommodate you.

Fixed Heating (Flued)

These models are ideal for heating large open plan living areas, and being flued, combustion gases generated when the gas is burnt are directed out of the home by means of a fixed flue pipe through the wall or ceiling. Their instant heat and optional heat settings ensure your whole room is always comfortable and cosy.

Come to expect **Warmth & ambience** in every corner of your home when you own a log fire heater.

Log Fire

The Style and Comfort of a Gas Log Fire...

Flame Gas log fires combine the effectiveness of convection heating with the romance of a log fire (with realistic flames) creating an ambience that will complete any room.

- Available in many configurations... Built – In, Freestanding or Inserts
- They provide quality indoor air – flued, direct vents and power flue assist in the removal of combustion gas to outside the home
- They are available in a variety of finishes and accessory options: remote controller, glass fronts, ceramic logs, stones, rocks, quartz or coal options
- **Flue kit & accessories sold separately (Unless stated otherwise)**

FLUE KIT SUPPLIED WITH
FREESTANDING HEATERS

Fluing Options...

Just like a traditional wood burning fireplace requires a chimney, a gas log fire requires a flue.

There are many variations in how a gas log fire can be flued and many different variables that will influence what product suits you - such as the environment or the space it will be installed in, or the technology used in the gas log fire you want.

"A site inspection by a qualified installer is recommended to advise on exact flue requirements"

A list of installers can be found at -

http://www.elgas.com.au/custom_forms/tradefinder/locator.html

ELGAS

Gas cooking is the ultimate lifestyle choice, with **instant controllable heat**, we can all create culinary masterpieces.

Cooking

ELGAS

When it comes to cooking, there's simply no substitute for LPG

Leading chefs agree that the instant, controllable heat of a direct flame that wraps around the pan provides the ultimate cooking experience. With Elgas LPG, that experience is available to everyone, no matter where you live.

Elgas LPG is a safe, dependable energy source that can really boost performance. It's also far more responsive than other energies, which is particularly practical when instant heat and fingertip-control are so important.

LPG gives you immediate heat on ignition that responds instantly to any change in setting and delivers a broader distribution of heat across the base of your cooking implements.

EMILIA

Italian Designed, Italian Made.

All the widths - 53, 60, 70, 80, 90cm

With the option of a fan assisted gas oven the Emilia cooker range is one of the biggest in Australia. Emilia has been providing cookers to Australian homes since 1999. All Emilia cookers feature flame failure protection as a standard feature - the gas stops if the flame extinguishes.

Safe. Efficient. Durable

Relax with a great range and special deals on LPG leisure and outdoor appliances

Leisure & More

Indoor comfort for the outdoors...

LPG has long been accepted as a fuel for use around the home for heating, hot water and cooking - however, there are other benefits throughout the household using LPG that deliver functionality, efficiency along with environmental benefits, such as - leisure appliances, standby power generation (generators), pool / spa and central heating.

Elgas has the great outdoors covered with a suite of appliances for you to choose. From leading brand BBQ's, patio and area heaters, portable hot water units, laundry and kitchen appliances. Elgas can provide you with the ultimate in outdoor entertainment and indoor comfort to suit most lifestyles.
